

Undersea Technology Apprentice Program M-Th, 0800-1300 Summer 2025
Session 2 - July 28, 2025 through August 14, 2025

Naval Undersea Warfare Center, Division Newport
Newport, RI 02841

Tel: 401-832-7796
E-mail:
john.dicecco.civ@us.navy.mil

Week	Date	Topics	Reference
1	7/28 7/29 7/30 7/31	Introduction: SeaPerch, ROVs and Raspberry Pi Physics of Water (fresh and salt) Engineering Design/Variable Speed Drive/Soldering Finish Controller/Debugging/Cyber security/sensors	Lecture/SeaPerch Manual Outdoor Test Tanks Lecture/UTAP Manual Lecture
2	8/4 8/5 8/6 8/7	Intro to Linux and Python programming Mission Briefing and testing Modifications/Programming/Practice/Serial Communications Evaluate Vehicle (full mock-up)/Prepare Engineering Documentation	Lecture Test Tank Test Tank /Lecture Test Tank
3	8/11 8/12 8/13 8/14	Practice/Modifications Practice Run/Full Mock-Up MINOR Modifications/Submit Engineering Reports/Competition Course/mission debrief/Competition results	Test Tanks Test Tanks Salt Tank Group discussion

Participate, be helpful, be considerate, and be tolerant of others opinions ... or we'll give your stipend to your team members!

Apprenticeship Content:

UTAP: Physics, mathematics, engineering, electronics, circuit assembly, soldering, programming, remote sensing, serial communications, cyber security, mechanical design, propulsion, interpreting technical documentation, budgetary constraints, teamwork, time management, technical writing.
